

# How to Create and Share an Osmosis Video Playlist

Creating a playlist of curated videos for your students is easy. Let's look at how to build a playlist using the Osmosis Video Library and the search bar as a starting place.

**Step 1:** Navigate to the Osmosis video you want to assign, or browse the library page from the home page using the navigation bar.

**Step 2:** From the library view: click "Add to playlist" button to the right. Click the playlist button.

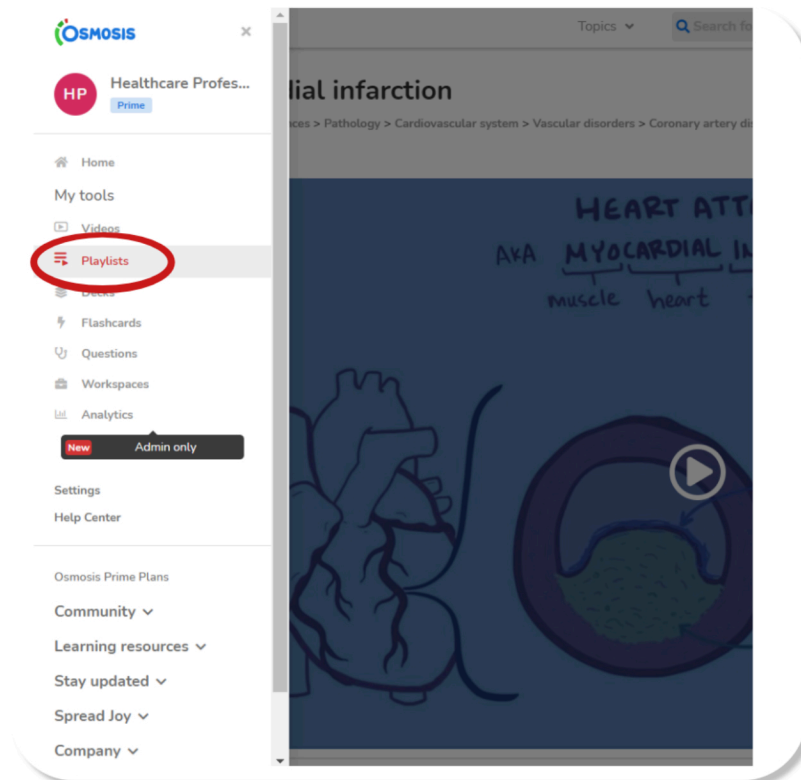

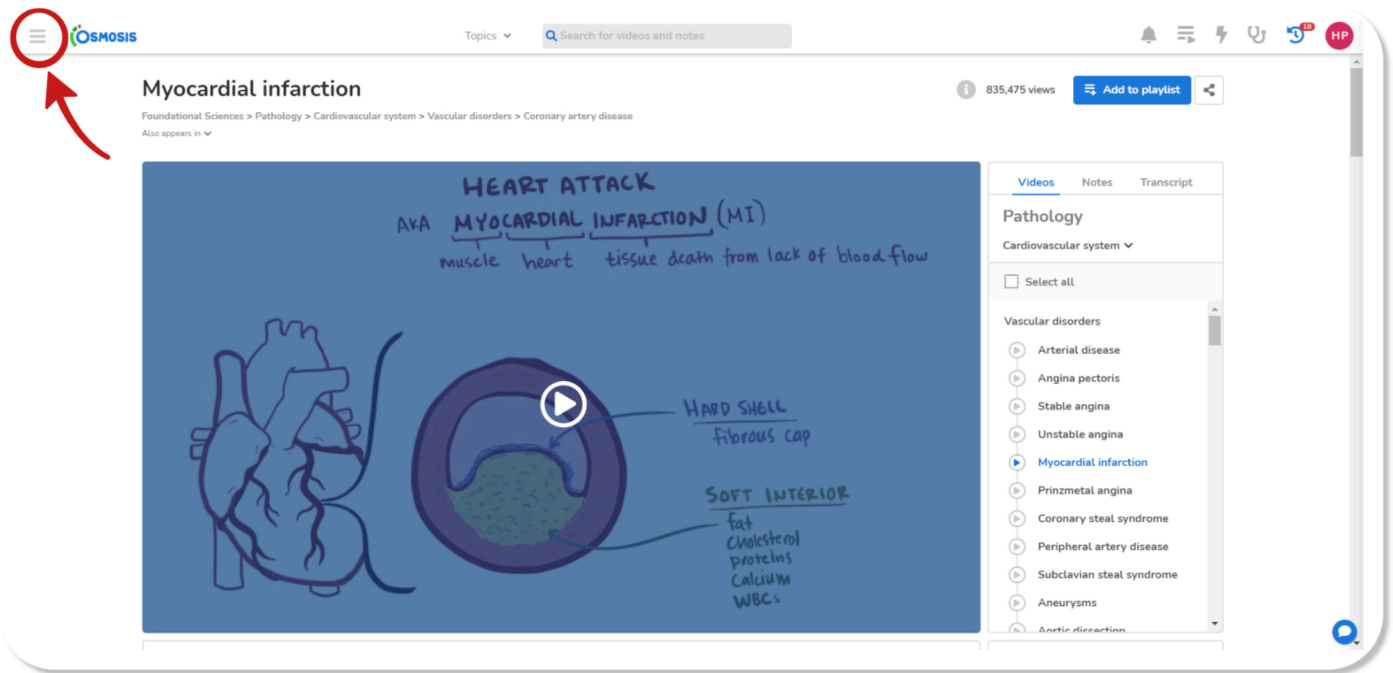

From a specific video learn page, click “Add to playlist” button to the right.

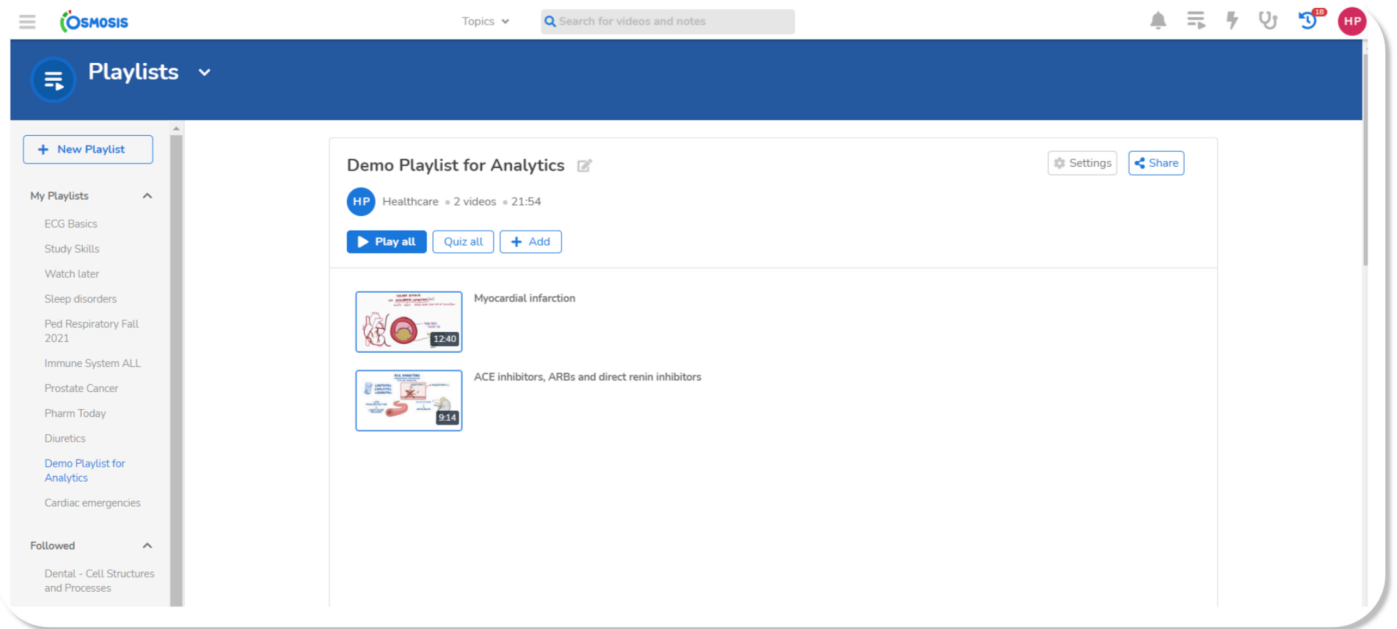

The screenshot shows the Osmosis interface for a video titled "Myocardial infarction". The video player displays a diagram of a heart with handwritten notes: "HEART ATTACK AKA MYOCARDIAL INFARCTION (MI) muscle heart tissue death from lack of blood flow". A cross-section of the heart wall is shown with labels: "HARD SHELL fibrous cap" and "SOFT INTERIOR fat cholesterol proteins calcium WBCs". The video duration is 12:40. In the top right corner, the "Add to playlist" button is circled in red. Below the video player, there are sections for "High Yield Notes" (5 pages) and "Assessments" (Myocardial infarction). The right sidebar shows a navigation menu with "Videos", "Notes", and "Transcript" tabs, and a list of "Vascular disorders" including Arterial disease, Angina pectoris, Stable angina, Unstable angina, Myocardial infarction (highlighted), Prinzmetal angina, and Coronary steal syndrome.

**Step 3:** Select the playlist you want to add your video to, or create a new playlist by pressing the grey + button and giving your playlist a title. Add as many videos as you want using this approach.

This screenshot shows the "Add to playlist" dropdown menu that appears when the button is clicked. The menu is titled "Save to..." and contains a list of playlists with checkboxes. The "Watch later" and "Demo Playlist for Analytics" options are checked. At the bottom of the menu, there is a "+ Create new" option. The background shows the same video player and sidebar as the previous screenshot, but the "Add to playlist" button is now greyed out.

**Step 4:** To view, edit, rearrange, and share your playlist, (**Step 4A**) click the hamburger menu next to the Osmosis icon) and (**Step 4B**) select the playlist you'd like to see from the playlist page.

You can rearrange the order of videos by dragging them with the = symbol (to the right of the video title), and delete videos by clicking the triple-dot symbol (on the far right).

**Step 5.** Sharing video playlists is as simple as clicking the “share” button, copying the link, and emailing or posting it to your LMS.
